LEE BEOMJUN

Marketing Manager · Influencer · Commerce · Data

Marketing manager with a background in content and creator partnerships, translating audience insights into commerce results. Experienced in planning, executing, and measuring domestic and cross-border group-buying campaigns, including major promotions involving over 100 influencers. My work spans campaign management, product feature launches, performance dashboards, and AI-assisted tool development—improving both marketing outcomes and the workflows behind them.

KEY RESULTS

+111%

Year-over-year growth in influencer marketing GMV — 2.11× the previous year

900+

Domestic promotions configured and launched in 2025 — US$11.7M in total GMV across projects I supported operationally

US$5.5M

Approximate annual GMV from cross-border promotions I directly managed

CAREER

AliExpress Korea

2024.01 – Present

Marketing Manager · Current

Influencer Marketing & Commerce Campaigns

- Plan, execute, and measure influencer-led group-buying campaigns across domestic and cross-border markets.
- Generated approximately US$5.5M in annual GMV from directly managed cross-border promotions.
- Identified and onboarded four key influencer channels, supporting their growth through data-informed product selection and creator–product matching.
- Lead two major promotional events annually, each involving over 100 influencers, alongside recurring monthly campaigns.

Domestic Group-Buying Operations & Service Improvements

- Personally configured and launched over 900 domestic product promotions in 2025, supporting projects that generated US$11.7M in total GMV.
- Led planning, execution, and performance management for domestic group-buying promotions over a two-year period.
- Contributed to the planning and launch of the in-app “Group Deal” feature, coordinating work between Hangzhou headquarters and the Seoul office.
- Established and improved promotion workflows in collaboration with cross-functional teams.

Data Analytics & Workflow Tools

- Built processes for consolidating and cleaning influencer campaign data, along with dashboards for tracking key performance metrics.
- Consolidated group-buying results and campaign trends to reduce repetitive data gathering for reporting and performance reviews.
- Built three AI-assisted tools for content trend analysis, deal monitoring, and internal expense reimbursement.

Semicolon Studio (SNOW)

2020.02 – 2023.12

Marketing Manager & Producer

Influencer Marketing

- Planned and executed an average of five or more influencer campaigns per month for film and television releases, generating 36.5M cumulative views.

Content Planning & Production (YouTube)

- Led content strategy and production as an early member of the PIXID YouTube channel, with early content reaching 25M cumulative views.

Commercial Film Production

- Contributed to script review and post-production for the feature film Dr. Cheon and the Lost Talisman.

CJ ENM DIA TV

2018.12 – 2020.01

Freelance Influencer Manager

Recruited and managed influencers in Greater China

- Managed YouTube channels and planned and produced original content.
- Supported remote collaboration between creators in Korea and China.

SELECTED PROJECTS

Three-Brand Collaboration | US$1.2M+ GMV

- Led a collaboration among three brands, generating over US$1.2M in GMV.

Influencer Campaign Incident Response | Resolved Within 18 Hours

- When all orders from an influencer deal campaign were canceled, informed the influencer and relevant stakeholders and proposed a recovery plan enabling customers to repurchase with an additional discount.
- Coordinated corrective action with headquarters and Korea-based teams, resolving the issue within 18 hours of occurrence.

Group Deal Feature Launch

- Contributed to the planning and development of a new in-app promotional format.
- Coordinated communication and collaboration between Hangzhou headquarters and the Seoul office.

Group-Buying Performance Dashboard

- Built a dashboard consolidating the team's group-buying results and campaign trends.
- Reduced repetitive data gathering for reporting and performance reviews.

TOOLS BUILT WITH AI

YouTube Content Trend Monitor radar.sumimasen.dev

- Built an app that tracks how quickly individual videos gain views across selected YouTube channels, making it easier to identify emerging topics within a category.

Deal Monitor hotdeal.sumimasen.dev

- Built a tool to monitor products promoted as deals across online communities and track where deals from our platform are being featured.
- Added historical lowest-price tracking to support price comparisons and promotion planning.

Internal Expense Reimbursement Assistant

- Built an internal browser extension that identifies expense categories from uploaded receipt images and assists with reimbursement form entry.
- Partially automated repetitive data entry in the expense reimbursement workflow.
